BlueService

Thank you for using BlueService. This service sends selected plain or rich text of Cocoa applications, e.g. TextEdit, Mail, Stickies, [DEVONthink](), supporting services to Bluetooth devices supporting OBEX Object Push or OBEX File Transfer. Use it to send notes or short messages to your legacy handheld computer or your mobile phone (especially useful if your phone is not supported by the Address Book application).

System requirements

Mac with Intel processor, OS X 10.6.8 or later.

Installing and updating

Simply move BlueService into your *Applications* or *Applications/Utilities* folder or into the folder *Services* (in the Finder visit the *Go* menu with the *Option* key pressed; choose *Library*; locate a folder named *Services*; if there is none, you can safely create it manually). Double-clicking service let's OS X learn about its new abilities; alternatively log out and in again.

In addition you may need to switch on the new Services menu options. Open *System Preferences*, then navigate to *Keyboard > Keyboard Shortcuts > Services > Text*. Turn on all options you want and optionally add a keyboard shortcut.

Using the BlueService services

Select a text (plain or rich) and choose the menu item 'Send to Bluetooth Device…' in the Services menu. Afterwards select a BlueTooth device and a channel (OBEX Object Push or OBEX File Transfer).

To remove unnecessary entries from your *Services* menu, use the *Services Preferences* option from the *Services* menu.

Known bugs and limitations

If you cannot send small plain text files to your Bluetooth device using *Bluetooth File Exchange*, then BlueService very likely won't work, too.

Version history

1.4.1	NEW	Can be double-clicked and installed like an application.
	Improved	Updated services names optimized for OS X Lion or later.
	Required	Intel-based Mac, OS X 10.6.8 or later.
1.4	Improved	Optimized for Mac OS X 10.4 Tiger and 10.5 Leopard.
	Fixed	Rare date/time formatting issue.
	Required	Mac OS X 10.4 or later.
1.3	NEW	Universal binary for Intel- and PowerPC-based Macs.
	Required	Mac OS X 10.3.9 or later.
1.2.2	Fixed	Memory management bug could cause crashes on quit.
1.2.1	Removed	Shortcut of menu item removed.
1.2	Improved	Service menu entry renamed to *Send to Bluetooth Device…*
	Improved	The current time stamp is now used to name new notes.
	Improved	Packet size is negotiated with receiver.
	Fixed	After canceling the Bluetooth browser, an unnecessary 'Bluetooth not available' alert was displayed on Mac OS X 10.2.4.
1.1	NEW	Connection timeout of 60 seconds.
	Improved	Size of text to send is only limited by receiver.
	Improved	More compatible packet sizes and better error checking.
1.0	Initial release.
